[Survey for master students on further education](#)

The University of Applied Sciences Aalen is conducting a survey about further education! Main focus of the survey are personal data, details on e-learning, requirements of further education and topics for prospective educational offers. This survey is part of the project „KoMaZe“ which deals with the conception of English Master modules and we are trying to find out which further educational offers the University of Applied Sciences Aalen should establish.

We invite you to take part in this survey. It is anonymous and takes about 10-15 minutes of your time:
