Instruction for the timekeeper, inventory counter, supervisor and cost monitor

Timekeeper (3 players):

- Measures the time it takes a part from a specified point (workplace 3) in production to finished product

Inventory counter (2 players):

- Counts the stocks of the **cabin** at **workplace 5**
  → after 1:30, 3:00 and 4:30 minutes

- Counts the stocks of the **floor elements** at **workplace 2**
  → after 1:30, 3:00 and 4:30 minutes

Supervisor (2 players):

- Observes what is happening in the game and analyses it

Cost monitor (2 players):

- Counts the stock at the end of every game and fills it in the excel sheet
- Enters the counted parts that the inventory counters measured in the excel sheet
