

Turning ideas into innovation.

Your challenge at ZEISS

// INNOVATION
MADE BY ZEISS

To strengthen our Team Corporate Research and Technology in Oberkochen (Germany), starting from now on, we are offering an

Internship in Innovation Management Manufacturing, Duration: 2-6 months

Your job

- Support Innovation Management conducting a study on the potentials of specific micro / nanotechnologies or novel computing architectures for ZEISS and on their impact for industry
- be part of a diverse and agile innovation team within Corporate Research and Technology
- research and evaluate applications and new technologies from a technological and economical point of view
- prepare and participate in discussions with internal and external partners from academia and companies
- acquire a good overview of the ZEISS business and technology development activities
- contribute out-of-the-box ideas and critically discuss opportunities

Our requirements

- you already finished your Bachelor degree in industrial engineering, physics, chemistry, computer science or adjacent fields at a university
- passion for innovation, new ideas and technologies
- an academic performance in the top 30% of your class
- a pragmatic, practical approach to problem-solving
- an open-minded, self-employed attitude
- a good sense of urgency and attention to detail when solving problems
- previous experience (e.g.: studies, start-ups, hobbies) around innovation are a plus
- basic knowledge in science and technology
- solid knowledge of basic mathematics
- you enjoy to grow and enhance your knowledge and skills in new areas

With more than 27,000 employees, ZEISS is one of the global leaders in the optical and optoelectronic industries and has been contributing to technological progress for 170 years. ZEISS develops and distributes lithography optics, measuring technology, microscopes, medical technology, eyeglass lenses, camera and cine lenses, binoculars and planetarium technology.

As a student, you will work with your colleagues as an equal. You will receive detailed insights into a company that creates products for tomorrow's world and lay the optimal foundation for your future career.
