

## Push the limits of what people believe is possible.

Our innovations have changed the world – and we're just getting started. Come be part of it.

At Nuance Automotive, we're futurists, re-imagining what's possible at the intersection of humans, mobility and machines – then making it happen. If you're ready to be a part of building and delivering the ultimate, future-ready mobility experience that is miles ahead of the competition, you should join us. Building on our deep expertise and unparalleled innovation, we are accelerating the pace of change and transforming the in-car cockpit. We've reimagined and redefined the mobility experience, creating a new standard that goes beyond driving to a connected and informed world. Today, we're shrinking the gap between the driver and the automobile, transforming the machine into a natural extension of the human inside.

Our Ulm office is currently looking for:

### Application Manager - Automotive

As an Application Manager you will be responsible for the support of our development and project management tools. Those are Jira for requirements and error management, GIT for configuration management. For document management you will help us to select and roll out a standardized document management tool. You will be part of the software change control board and work closely together with the technical teams, project and quality management.

#### Responsibilities:

- Analysis of tool requirements of different departments and our customers
- Support the conception of a long-term tool landscape from technical as well as from user point of view
- Optimization of infrastructures and systems to the needs of the organization-wide stakeholders
- Cross-project configuration management
- Consulting and training of our internal teams
- Execution and monitoring of tests for new tools
- Creation and administration of process and system documentation

#### Qualifications:

- Academic degree in Computer Science, Information Science or an equivalent qualification training (for example information technology clerk) - also newcomers with IT experience are encouraged to apply!
- Affinity to IT topics and good technical understanding
- Experience with software development tools as a user
- Excellent oral and written communication skills in German and English essential;
- Thorough, transparent and structured way of working;
- Reliability and outstanding teamwork and cooperation skills;
- Experience with Jira, Git etc is a plus
