

# UI / UX Designer & Frontend Engineer

Full-time, Part-time

**BLP Digital**

## About BLP Digital and the project:

Are you passionate about developing smooth and seamless designs for impactful applications? Does the prospect of dealing with complex problems in different fields excite you? Do you want to play an instrumental role in building artificially intelligent products and combine human machine interaction?

BLP Digital AG is a young ETH Spin-off and at BLP we focus on increasing white collar productivity by automating repetitive tasks such as document processing with Artificial Intelligence. Our hierarchy is flat and communication direct, which means that we operate and learn fast, as a team. We are looking for a frontend engineer and UI/UX expert to join our core team building great products.

Among your **main responsibilities** will be to:

- Develop and implement the UX for our products
- Design the UI or lead this by working closely with a designer
- Implement the frontend application using react.js

## What we offer:

- Highly talented team with the ability to work in a fast-paced environment - we only work with top-notch scientists, engineers and entrepreneurs (most team members have ETH background)
- Competitive salaries
- Regular team events like AWS summit in Berlin
- Offices in Schorndorf (Germany) and Zurich (Switzerland)
- Flexible working

## Basic qualifications:

- BA/BS in computer science / design or related field
- Competence and strong interest in two of the following:
- UI, UX, frontend development, software engineering, product development

## Preferred qualifications:

- Master in computer science or related field
- Experience in frontend developing using react.js
- UX, UI experience

Interested? Meet us! Please send a quick application with your CV to
