European Graduate Program - Supply Chain
(01.10.2020 / different locations across Europe)

Are you looking for an opportunity where you can bring your unique skills and talents to work every day? Do you thrive on ideas and making a visible impact? Do you want to work with colleagues who are as excited about what they do as you are, and who are building meaningful careers? Join us at Avery Dennison.

Our two-year rotational European Graduate Program offers you the opportunity to start your career with a global market leader that has innovation in its DNA and is dedicated to creating a more sustainable world. As part of this program, you will put your skills into practice working on challenging, multi-faceted assignments within your area of expertise in a fast-paced and multicultural environment, often even in two different European countries.

While you are on this exciting journey, you will receive plenty of support along the way. Our Mentoring Program, combined with a concentrated blend of experiential on-the-job learning, classroom and online training will enable you to build your skills and transition from college to the corporate workplace, leveraging strengths and defining your career path.

What we can offer you!

Within the Supply Chain Stream of the program, you will be exposed to assignments with real, hands-on responsibilities integral to our business. Your energy and drive, as well as your technical, communication and leadership skills, will ensure that you are able to make your mark and contribute to our ambition to define and deliver world-class manufacturing processes, products and services.

Your tasks may include activities such as:

- Support of continuous improvement projects at local as well as European level within the various fields of our Supply Chain like Transportation, Inventory, Demand Planning etc.
- Involvement in improving our Supply Chain processes by providing data analysis and optimization of processes and methodologies
- Contribute as part of our production planning team in achieving our service and inventory targets

What we expect from you!

- University Degree (Bachelor / Master) in a relevant Engineering / Business field
- First relevant practical experience (e.g. internships, project work), preferably in an international manufacturing environment
- A good level of English
- Willingness to relocate into different projects and locations across Europe during the program

We are looking for agile problem-solvers who enjoy working in a dynamic and collaborative environment, and who are striving to make a difference by contributing their own strengths and ideas.

Applying for European Graduate Program means going all out for an exciting, dynamic and multi-faceted opportunity that offers new challenges each day. Are you ready to take on the challenge? Please apply online now via our Career Pages or using the direct link to this position!
