- You have experience and interest in UX & service design, graphic design, product development, user research and prototyping
- You have a design portfolio that demonstrates design principles for web and / or mobile platforms
- You are well versed with the knowledge of Visual Design Principals, Design Methodology and Best Practices
- You are able to produce excellent production level graphics after understanding business objectives, brand guidelines in Sketch/Adobe suite of products
- You can incorporate branding requirements; create style guide and reusable templates for wireframes as well as visual designs
- You have a good understanding of Accessibility and are able to communicate your ideas clearly and work independently
- You are fluent in English (spoken and written), German is a plus
- You are available for at least 3 months (ideally 6 months) and have a valid work permit for Germany

WHAT WE OFFER

- A comprehensive onboarding with insights into the whole company
- Opportunity to learn different aspects design at different stages of digital product maturity by practice
- Improve your skills with participating in UX visioning workshops
- Attractive, flexible and friendly working environment to grow with a successful start-up
- Certificate of internship completion
- Fresh fruits, free drinks and bunch of football lovers

Bilfinger Digital Next GmbH is a startup of more than 35 experts headquartered from Heidelberg, city of science and one of the most beautiful cities in Germany. As part of Bilfinger SE group, we serve industries such as oil & gas, chemical, pharma, metal, cement, and benefit from industry expertise and network of over 35000 colleagues across the globe. We also work closely with our partners like Microsoft, Siemens, Software AG and more.

We are building the most sophisticated industrial IoT platform for process industries to enable the successful digital transformation of our clients. To make this happen we work on innovative business models and a portfolio of digital solutions based on state-of-the-art technologies such as Artificial Intelligence, Big Data Analytics, Machine Learning and Digital Twins.

WE MAKE IT WORK
