

(Senior) User Experience Designer (f/m/d)

📍 Ulm

About us

For future mobility concepts and in-car user experience, software is set to play an even more decisive role. Elektrobit (EB) is a visionary global supplier of embedded and connected software products and services for the automotive industry with more than 3400 employees worldwide. For over 30 years now, we have been developing pioneering technologies for automated driving, new vehicle infrastructures, connected cars, and user experience. We are a wholly owned subsidiary of Continental AG.

At EB we are working toward a world in which mobility causes zero fatalities, produces low emissions, and transforms your commute into quality time. In our collaboration with our customers, including Audi, BMW, Daimler, Ford, GM, Volkswagen Group, Volvo, and many more, we live and breathe our passion for automotive software and for the mobility of tomorrow.

Join our UX team in Ulm to shape the mobility experience of tomorrow.

Your responsibilities

You conceptualize user-friendly interfaces in the human-centered iterative approach and realize them in detailed user interfaces under consideration of brand- and automotive requirements

For this you create independently user experience design artifacts such as personas, wireframes and flowcharts

You analyze and describe user goals, use cases and workflows

You develop and maintain design systems and style guides over the product development lifecycle and design user interface artifacts like layouts, UI elements, icons and animations

You create mock-ups, prototypes and simulations to validate the user experience early on and coordinate with the developer's implementation details to secure the quality in the final product

By specifying your concepts and designs carefully you help to streamline the handover process and to deliver implementation-ready assets

Also, you present your work results to customers and stakeholders

Your profile

You hold a university degree in User Experience Design, User Interface Design, Interaction Design, Communication Design or similar

In the area of UX/UI you have at least 3-5 years of work experience and you are confident in applying usability standards and human factors to your concepts and designs

A big plus is your knowledge about automotive UX, Google Android (Automotive), operating system and software development in general

You have strong analytical and problem-solving skills with the ability to focus on the essentials while having the user in mind

You are a profound user of the Adobe Creative Cloud application suite but with your strong visual thinking skills and you don't necessarily need a PC to draw a picture

You have advanced knowledge about responsive layout techniques and use them confidently in your design files created in Sketch or Figma

You are familiar with rapid prototyping tools like ProtoPie, Framer, Adobe XD or similar

Very good communication skills in English (spoken & written) are a prerequisite, German is a plus

What we offer

Working on exciting and future-oriented projects in international collaboration within a multicultural and diverse team
