At Worldline, connecting and securing transactions is what we do every single day. Covering the entire payment value chain, our technological guides build and operate digital platforms that handle the millions of highly critical transactions between a company, its partners, and its customers. Do you want to improve quality & productivity of IT solutions of leading companies?

Do you want to work in a highly motivated team within a good atmosphere, supported by a network of supplementing departments in a larger company, allowing to develop yourself and to even grow your potential? Are you looking for a new job opportunity enabling to use your high degree of individual creativity?

We are looking for a motivated team member for our location in Sindelfingen. As such you will contribute to engineering and maintenance of our software product family named BOOM, used by our customers to ensure and improve availability & performance of their IT service and application infrastructures, within market segments IoT, Healthcare, as well as general IT. Doesn't this role sound exciting to you?

Your day-to-day responsibilities include:

- Requirements engineering (analysis, clarification, specification; functional, and non-functional)
- Software engineering (architecture, design, code, test, documentation)
- Roll-Out, DevOps, Troubleshooting
- Support Project Management (planning, controlling)

Skills we can’t do without:

- strong technical experience in software engineering
- several years of professional experience in software engineering of distributed software
- ability and ambition to lead / coach other development team members
- very good analytical skills
- ability to communicate technical subjects to non-technical persons
- deep knowledge in Java 8, Java 11+
- advanced knowledge in networking, cooperating servers, distributed, massive processing
- SQL, RDBMS (Oracle, MySQL, MS SQL, etc.)
- REST eco-system with focus on performance and security aspects
- various revision control and build environments (CI/CD; Ant, Maven, Gradle, GIT, GITLab)
- unit test frameworks
- advanced OS know-how (Windows, Unix / Linux)
- shell scripting (Powershell, shell, bash, etc.)
- English skills (fluent), German skills (basic)

Skills we’d like:

- Akka, Vert.x
- Scala
- Netty
- Angular
- RCP
- message bus (ActiveMQ, RabbitMQ, other)
- Docker
In addition to joining a global leader in digital transformation, you can also expect an excellent range of benefits. These include: a rewarding salary, 30 days’ annual leave, an attractive pension scheme plus many more.
