### **Working Student Devops Engineering (Python) (f/m/d) (Job ID: 61259)**

As a working student in the field of DevOps Engineering at BMW Car IT in Ulm you will be creating an automated changelog and change notification system for a distributed continuous integration (CI) system. We want to gather and track configuration changes from different sources (GitHub, Kubernetes) and automatically inform system operators about them, e.g. by posting summarized information to a chat system.

#### **What awaits you?**

- Agile software development.
- State-of-the-art DevOps methods and tools.
- Insights into DevOps in multi-cloud environments.
- International working environment.
- Flexible working times.

#### **What should you bring along?**

- Studies in the field of computer science or similar.
- Experience in Python programming and Git/GitHub.
- Understanding of Docker, Kubernetes, and Linux is beneficial.
- Ideally some experience with Continuous Integration (CI) practices and tools (e.g. Jenkins, zuul).
- Good English skills.

**Are you enthused by new technologies and an innovative environment?**
