In the Consumer Products segment of ZEISS, we are developing solutions contribute to world optics development and technological progress. With our passion for excellence, we create value for our customers and inspire the world to see in new ways. Impressive works of photographic and cinematographic art have been created using ZEISS lenses since 1890. Premium optics in riflescopes, binoculars and spotting scopes enable unique moments in nature.

Your Role

As a student apprentice you will be part of a dynamic team working with best-practice Project Management methods & frameworks that help our Project Managers and their teams to drive high quality product development. With full responsibility for your own initiatives and projects and your strong communication & moderation skills you will be working in multi-disciplinary teams. You contribute along the whole Innovation & Development Process by guiding along the process as well as implementing and conducting necessary tools and methods to generate solutions that will shape the future of our customers.

Your profile

- Student in bachelors degree in a scientific, engineering or business discipline
- Preferably experience in implementing and working with Project Management tools and methods along a product-oriented development process
- Good tool skills in MS Office and best-case MS Project
- Ideally an affinity for digital technologies and the ability to think in data driven solutions
- You have strong collaborative and teamworking skills, structured and results-oriented working methods
- You already have experiences abroad? This would be a plus.
- High level of communication skills – very good knowledge in English and German
