

Working student (m/f/d) sustainability project management

Do you want to be part of a company that changes the world? As working student (m/f/d) project management at Fosera you will bring reliable solar systems to the 2 billion people, still living off-the-grid. We are a young, ambitious, purpose driven company in the B2B solar business with headquarters in Ulm and subsidiaries in Thailand and Ethiopia. Our main markets are in Africa, Asia and Latin America. Join our team and make a real difference in the lives of many people.

You will

- work closely with our CEO on topics that have a direct, social and environmentally friendly impact
- support the design, application and management of different projects (Carbon Mitigation, reduction of plastic in production and logistics...)
- create and evaluate project reports
- organize international events and trade fairs
- support in general administrative and organizational issues

You have

- completed the first semesters of your studies in sustainable corporate management, business administration or equivalent
- ideally first experience in managing sustainability projects
- hands on experience with MS Office
- good English skills to communicate confidently in our international team
- a quick grasp, joy in working independently and bringing topics forward

Do you want to be part of a company that changes the world?

Then we should meet! Please send your application documents with salary expectations and a possible starting date to jobs@fosera.com

About us

At Fosera, we are passionate about developing innovative and reliable solar systems for the 2 billion people, still living off-the-grid. Our products are small solar systems for basic energy needs such as lighting, charging or cooling food. Founded in 2011, we are an innovative, purpose driven company with headquarter in Ulm and subsidiaries in Thailand and Ethiopia. Our 120 employees appreciate our modern and familiar working environment. They trust in our strong, long-lasting partnerships and foster them by contributing their own reliability and ideas. Seeing the direct, positive impact of their work on the lives of our customers and on the environment makes them proud to be part of the team.
